In spite of recent fierce criticisms of this country's aims and purposes by the radical section of the South American press, it is pointed out as significant that in no case have the newspapers which make these criticisms voiced the sentiment of their Governments or of the dominant element in their nations. The Administration at Washington is convinced that there is at this time less suspicion in the minds of the intelligent and ruling classes among the Latin-American people toward this nation than at any time since the Monroe Doctrine was first proclaimed. Feeling secure in this belief, and with the further knowledge that the present congress is to be held under the auspices of President Diaz, there is a feeling of the utmost confidence in Washington that the congress will be productive of vast and substantial good.
